

# Public Notification

The National Centre for Animal Health under the Department of Livestock is conducting mass dog sterilization and anti-rabies vaccination programme in Thimphu Thromde areas. The field clinic is set up in Deobum Lam (Office of the Assistant Engineer, Thimphu Thromde). The clinic started operation from this location w.e.f. 5<sup>th</sup> April 2021.

In this regard, the public is requested to bring your pet and community dogs for sterilization, vaccination and deworming. Our dog catchers will be coming to your locality to catch dogs between 6.30 AM to 8 AM as per the schedule given below. Kindly support our catching teams to catch as many un-sterilized (un-notched) dogs as possible. This is a shared problem and for this campaign to succeed, public support is absolutely crucial. We also welcome local volunteers/community champions to help us with information on stray dogs in your localities.

For more details contact Dr. Hiruka Mahat @ 17607846 or Mr. Pema @ 77235539
